

# Checklist for your dogs first-aid kit

- ☐ First aid kit (disinfectant, ointment, scissors, bandages, disposable gloves)
- ☐ Thermometer
- ☐ Tweezers
- ☐ Traumeel ad us. vet.
- ☐ Remedies for diarrhea (e.g. probiotics)
- ☐ Tick tweezers
- ☐ Parasite protection (according to the region)
- ☐ Nurexan ad us. vet.
- ☐ Medication: sufficient quantity of medication that your dog may need to take regularly
- ☐ Eye rinsing solution for cleaning the eyes and small wounds
- ☐ Cream for the care of chapped, irritated skin or for superficial wounds, e.g. on the paws (e.g. Ichtho Vet Derma Cream)

Of course, even the best first-aid kit cannot solve every health problem: If the dog is ill or has a more serious injury, a visit to the vet is mandatory, even on vacation. You should therefore carry a list of addresses and telephone numbers of veterinary clinics and vets at your vacation destination with you or, ideally, save the numbers in your cell phone at home.
